Phillip A. Angelos

pangelos@bu.edu • (248) 929-4292

Research Interests

My research bridges artificial intelligence and psychology, with a focus on theoretical and computational approaches to decision-making, particularly in adverse or maladaptive contexts. My work integrates computational modeling to better understand the cognitive and neural mechanisms underlying these processes. My broader interests extend to computational psychiatry, where I aim to use mechanistic brain models to better understand the relationship between neural mechanisms and clinical presentation, with the hope of informing more precise approaches to diagnosis and treatment.

Education

Ph.D. in Computing and Data Sciences *Sep. 2025 – Present*
Boston University — Boston, MA

B.S. in Psychology, with Honors *Aug. 2019 – May 2023*
Michigan State University — East Lansing, MI
GPA: 3.81 (Major GPA: 3.93) • Minors in History & Peace and Justice Studies

Research Experience

Post-Graduate Research Assistant — Yale Powers Lab *Jul. 2023 – Jul. 2025*
Department of Psychiatry, Yale University — New Haven, CT

- Collaborated with a Yale graduate student to design and optimize a Spherical Convolutional Neural Network (SCNN) integrating DeepSurv for sMRI data analysis, leveraging voxel-based morphometry to predict psychosis conversion in clinical high-risk populations.
- Developed experimental research tasks across JavaScript, Python, and MATLAB; authored a custom Python script to automate participant data formatting for NIH/NIMH grant compliance.
- Led MRI and EEG data collection sessions and implemented preprocessing pipelines to ensure data integrity and reproducibility.
- Administered, scored, and reviewed SCID and SIPS clinical interviews with high-risk participants.

Undergraduate Research Assistant — The Belief Systems Lab *Feb. 2022 – May 2023*
Michigan State University — East Lansing, MI

- Co-led the development of experimental materials for a replication and extension study of Pennycook et al.'s (2018, JEP:G) seminal work on prior exposure effects in misinformation perception.
- Analyzed and processed over 500 open-ended survey responses examining everyday worries, contributing to research on perceived threats and political attitudes.
- Contributed to materials for a doctoral thesis investigating attributions of group blame for historical atrocities, including designing tailored vignette stimuli.

Undergraduate Research Assistant — Pride and Envy Project *Mar. 2022 – May 2023*
Michigan State University — East Lansing, MI

- Optimized daily diary data collection through Qualtrics, managing survey administration and resolving technical challenges to streamline automated participant acquisition.
- Conducted data cleaning and quality control analyses using Python and JASP, implementing procedures to flag incomplete or suspect responses.
- Recruited participants across leading Michigan universities, including the University of Michigan and Wayne State University.

Teaching Experience

Teaching Assistant — PSY 200: Cognitive Psychology *Aug. 2022 – Dec. 2022*
Michigan State University — East Lansing, MI

- Conducted in-person office hours, supporting students with lecture material, content review, and assignment guidance.
- Prepared and delivered supplementary mini-lectures on cognitive psychology topics, with an emphasis on decision-making and cognitive control.

Teaching Assistant — PSY 235: Social Psychology *Jan. 2023 – May 2023*
Michigan State University — East Lansing, MI

- Provided comprehensive student support through weekly online office hours, assisting with course content and academic skill development.
- Evaluated closed- and open-response coursework using established rubrics, providing constructive written feedback.

Publications

Palmer, W. C., **Angelos, P.**, Powers, A. R., Cannon, T. D., & Yildirim, I. (2026). GENESIS: A computational model of visual hallucination progression integrating sensory noise and expectation updating. *[Manuscript in preparation].*

Angelos, P., Palmer, W., Powers, A., & Cannon, T. (2025). Spherical convolutional neural networks and DeepSurv: Deep learning and survival predictions in clinical high-risk for psychosis. *[Manuscript in preparation].*

Angelos, P. A., Epie, B., Mourgues-Codern, C., Greenwald, M., Palmer, W., Vega, A., & Powers, A. (2025). Understanding the mediating influence of control between thought suppression and symptom severity. *[Manuscript in preparation].* Department of Psychiatry, Yale University.

A.**, Bond, A., Farina, E., Fredericks, C., Gandhi, J., Garrison, J., Karvelis, P., Leptourgos, P., Lindner, M., Martin, M., Menon, M., Powers, A., Silverstein, S. M., Sterzer, P., Corlett, P. R., & Benrimoh, D. (2024). A computational account of the development and evolution of psychotic symptoms. *Psychological Medicine.* [In Press].

Invited Talks & Professional Service

Invited Talk: "LLMs as Clinicians" — OPAD Lab, Boston University *Mar. 2026*
Boston University — Boston, MA

Peer Reviewer — Annual Conference of the Cognitive Science Society (CogSci '26) *Mar. 2026*
Cognitive Science Society

Awards, Honors, & Memberships

- Dr. Lauren Harris Psychology Scholarship ($2,000 award) *Dec. 2022*
- MSU Greek Life All-Around Spartan Award *Nov. 2022*
- Psi Chi National Honor Society in Psychology — Member
- Order of Omega Honor Society — Member
- Michigan State University Dean's List *Sep. 2021 – May 2023*

Skills & Certifications

Languages: English (native), Spanish (native)
Programming: Python, R, MATLAB, JavaScript, Julia, CUDA, NetLogo
Software & Tools: Qualtrics, REDCap, SPSS, JASP, Adobe Photoshop, Illustrator, Premiere Pro, Bridge

Extracurricular Activities & Leadership

- Psi Chi, Michigan State University Chapter — Treasurer
- Immortals E-Sports — Social Media & Marketing Intern
- Inter-Fraternity Council — Vice President of Communications
- Psychology Club — Member, Michigan State University
- MSU League of Legends — Player and Head Coach
- MSU Intramural Sports — Referee
